SUMMARY

Full-stack developer and BS Software Engineering student with experience building React and TypeScript applications, integrating APIs, and implementing authentication and database workflows. Projects span a university platform, an offline desktop POS system, and a healthcare web application.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Vite

Backend and data: Node.js, Express, REST APIs, Supabase, PostgreSQL, Firebase, SQLite

Tools and integrations: Git, GitHub, Vercel, Tauri, Zustand, TanStack Query, OpenAI API, Gemini API

SELECTED PROJECTS

ComsatsHub | University Student Platform Live website

- Built a React and TypeScript portal with faculty reviews, GPA calculation, student profiles, and Supabase authentication and data storage.
- Implemented timetable generation using backtracking and time-slot overlap checks to produce course and section combinations without clashes.

APNA POS | Desktop Retail Management System

- Developed a React and TypeScript desktop application with Tauri, a Rust backend, and SQLite for inventory, sales, customer accounts, and reporting.
- Implemented local REST and WebSocket interfaces for paired devices, with authentication and shared transaction handling for sales and stock updates.

MediScript | Healthcare Web Application

- Built React interfaces and Express APIs for appointments, patient workflows, and prescriptions, backed by Supabase authentication and PostgreSQL.
- Implemented prescription PDF generation, signed storage links, and scheduled appointment reminders to connect clinical workflows with document delivery.

EXPERIENCE

Freelance Web Developer | Self employed 2024 - Present

- Developed client websites and applications, including a construction business website with an AI-assisted quotation feature using Gemini API.

Software Engineering Fellow | Headstarter AI Aug - Sep 2024

- Collaborated on AI and web projects, including GameFlip; contributed UI development, authentication, AI flashcard generation, and Stripe integration.

Junior Web Developer | Meticulous Services Nov 2023 - Jan 2024

- Designed and developed a business website frontend aligned with company requirements and branding.

EDUCATION

BS Software Engineering Expected 2027

COMSATS University Islamabad, Abbottabad Campus
